

INDICE

- Nuova strumentazione per il settore Analisi – JUMO AQUIS touch Series
- I cablaggi rappresentano il passato – Misure di Pressione e Temperatura Wireless JUMO Wtrans Series
- Nuovo Regolatore Programmatore a 2 Canali JUMO DICON touch
- Focus applicativo: Settore Lavorazione della Carne

JUMO AQUIS touch Series

JUMO, the measuring and control specialist, is expanding its AQUIS touch series with a compact multichannel measuring device. Four tasks – measuring, controlling, recording, and displaying – are covered with only one device. Perfectly matched to the beverages industry – the devices are available in a surface mounted or a panel mounted case.

JUMO Wtrans Series

Wireless technology is now as commonplace in the business world as it is at home. Temperature and pressure are two of the most frequently measured physical measurands. JUMO has been active for decades in high-quality temperature and pressure measurement and has continually adapted its product range to accommodate the requirements of its customers.

JUMO DICON touch

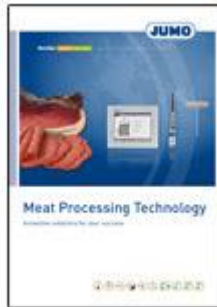

JUMO DICON touch - a two-channel process and program controller - is characterized by highly consistent control results. Even complex tasks are easily achieved with this device. Operation and configuration have been optimized and made more convenient for the user.

Lavorazione della carne

In this brochure you will find a selection of the JUMO solutions for the processes in the meat industry. JUMO, as your partner, will be at your side whether you want to use the measurands temperature, pressure, conductivity, or pH-value to monitor the quality of your product, control cleaning, reduce production costs, or improve productivity.
